Clinical Trials for Blood Cancers

INVESTMENT OPPORTUNITY: Considine Hematology Research Fund

Some 1.3 million Americans are living with a blood cancer: lymphoma, leukemia or multiple myeloma. To advance promising research in this area, multiple myeloma survivor R.W. Considine has generously committed a \$500,000 matching gift to establish the first Hematology Research Fund at Banner MD Anderson Cancer Center. Donor gifts will be matched dollar for dollar, for a total of \$1 million to expand these clinical trials.

The Promise of Clinical Research

Patients who participate in clinical trials gain access to the best and newest treatments available. And, trial participants help others who will benefit from the findings in the future. Banner MD Anderson Cancer Center is building an extensive clinical research portfolio and advanced cancer therapeutics, with the goal of being *the* location where patients have the best possible chance for a cure.

Banner MD Anderson's hematology oncology program sees the highest volume of patients, second only to its breast cancer program. The Considine Hematology Research Fund will expand trials of blood cancer therapies right here in Arizona, including the promising CAR T-cell immunotherapy trial targeting lymphoma, and support efforts to make these trials more accessible to patients.

Double Your Donation

- Mail checks payable to Banner Health Foundation-Hematology Research Fund to Banner Health Foundation, 2901 N. Central Avenue, Suite 160, Phoenix, AZ 85012.
- Donate online at give.bannerhealth.com/hematology
- To discuss making an estate gift or giving non-cash assets such as stock, call 602-747-4485 or email supportcancer@bannerhealth.com
